Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to an applicator device, classified in class 15, subclass 244.1.
 - II. Claim 12, drawn to a method of treating (i.e. coating) a surface, classified in class 427, subclass 429.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case (I) the process as claimed can be practiced by another materially different apparatus such as one which does not have a **means** for gripping (as recited in claim 1), a secondary grip detachable from the primary grip (as recited in claim 9), or the detents (recited in claim 10) and (II) the apparatus as claimed can be used to practice another and materially different process such as one which was not used in the recited order recited in claim 12 (vertical then horizontal) or even used to coat a surface which was neither.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1744

4. During a telephone conversation with Sean Bradley on 3 May 2005 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-11.

Affirmation of this election must be made by applicant in replying to this Office action.

Claim 12 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Forbis (USP 2,261,058). The patent to Forbis discloses a device comprising two sections (6,8) which have a weakened area (9) between them to permit the severing thereof (column 1, lines 43-48) and wherein one of the sections (8) including a porous absorbent filamentary material (7) (column 1, lines 38-40) covering a substantial portion thereof. Once severed, the exposed portion of segment (8) would provide a means for gripping the applicator.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 4,5,7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Forbis (USP 2,261,058). The patent to Forbis discloses the invention substantially as claimed with the exception of the material of the pad or specifying the material of the handle. It has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Allowable Subject Matter

9. Claims 9-11 are allowed.

10. The following is a statement of reasons for the indication of allowable subject matter: The prior art failed to suggestion, in particular in combination with an applicator as defined in claims 9 and 10, a secondary handle/gripping element attachable to the applicator portion

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited patents are pertinent to implements which include at least one line of weakness so that portions thereof may be severed.
